Partnering for Pollinators

- “Pollinators and their habitats play an important ecological and agricultural role in Massachusetts,” **said MassWildlife Director Jack Buckley**. “This interagency project will improve conditions of common and rare pollinators and their habitats and serve as a model and visual reminder to other Massachusetts land owners that by implementing simple landscape maintenance practices, they can improve the ecological value of our lands.”

- "The Massachusetts Transportation Department is always pleased to partner with non-profits and other groups to undertake projects benefitting the community and the world we live in," **said District 5 Highway Director Mary-Joe Perry**. "MassDOT landscapes as part of its highway and bridge projects so it is a common sense and worthwhile step to take in creating habitats as we complete necessary construction work."
